## United States District Court Southern District of California

**ANTHONY ESPOSITO**

(Enter full name of plaintiff in this action.)

Plaintiff,

v.

**D. KHATRI, M.D.****C. COOK, AGPA****DR. AYMAR****T.H. CALVIN, JR., M.D.**

(Enter full name of each defendant in this action.)

Defendant(s).

**08 CV 0742 H WMc**

Civil Case No. \_\_\_\_\_

(To be supplied by Court Clerk)

Complaint Under the  
Civil Rights Act  
42 U.S.C. § 1983

**A. Jurisdiction**

Jurisdiction is invoked pursuant to 28 U.S.C. § 1343(a)(3) and 42 U.S.C. § 1983. If you wish to assert jurisdiction under different or additional authority, list them below.

**B. Parties**

1. **Plaintiff:** This complaint alleges that the civil rights of Plaintiff, Anthony Esposito,  
(print Plaintiff's name)  
\_\_\_\_\_, who presently resides at Centinela State Prison,  
(mailing address or place of confinement)  
P.O. BOX 931, Imperial, CA. 92251, were violated by the actions  
of the below named individuals. The actions were directed against Plaintiff at Centinela  
State Prison on (dates) 11/2/06 thru 2/07/2008, and Present.  
(institution/place where violation occurred) (Count 1) (Count 2) (Count 3)
2. **Defendants:** (Attach same information on additional pages if you are naming more than 4 defendants.)

Defendant D. Khatri, M.D. resides in Centinela State Prison (CSP)  
(name) (County of residence)  
 and is employed as a Chief Physican. This defendant is sued in  
(defendant's position/title (if any))  
 his/her ☒ individual ☒ official capacity. (Check one or both.) Explain how this defendant was acting

under color of law: As Chief Physican of CSP, this defendant has an affirmative duty to assure that Plaintiff's Medical needs are acted upon. However, the omissions (deprivation of Medical Care) are "sufficiently harmful and Plaintiff is continuing to have severe chronic Cervical and Lumbar pain;" which has subjected him to "wanton" deprivations of his Medical needs, by this defendant; violating Plaintiff's right protected by Federal law. (Eighth Amendment)

Defendant C. Cook, AGPA resides in Centinela State Prison (CSP)  
(name) (County of residence)  
 and is employed as a Medical Appeals Analyst. This defendant is sued in  
(defendant's position/title (if any))  
 his/her ☒ individual ☒ official capacity. (Check one or both.) Explain how this defendant was acting

under color of law: As Medical Appeals Analyst of CSP, this defendant has an affirmative duty to assure that Plaintiff's Medical needs, which are appealed and substantiated, are acted upon. However, the admitted omissions (deprivation of Physical therapy/Medical Care) are "sufficiently harmful and Plaintiff is continuing to have sever chronic Cervical and Lumbar pain; and is subjected to "wanton" deprivations of his Medical needs, which have been admitted to by this defendant, violating Plaintiff's right protected by Federal Law. (Eighth Amendment)

Defendant Dr. Aymar resides in Centinela State Prison (CSP)  
(name) (County of residence)  
 and is employed as a Medical Physican (CSP). This defendant is sued in  
(defendant's position/title (if any))  
 his/her ☒ individual ☒ official capacity. (Check one or both.) Explain how this defendant was acting

under color of law: As assessing and follow-up Medical Physican of CSP, this defendant has an affirmative duty to assure that Plaintiff's Medical needs, which have been assessed and followed-up on, are acted upon. However, her admitted omissions (deprivations of Physical Therapy, C-Spine Facet Blocks, Epidural injections/Medical Care) are "sufficiently harmful and Plaintiff is continuing to have severe chronic Cervical and Lumbar pain; and subjected to "wanton" deprivations of his Medical needs, which have been admitted to by this defendant; violating Plaintiff's Eighth Amendment Federal right.

Defendant Travis H. Calvin, Jr., M.D. resides in 1505 W. Ross El Centro, CA 92243  
(name) (County of residence)  
 and is employed as a Outside Contracted Neurologist for CSP. This defendant is sued in  
(defendant's position/title (if any))  
 his/her ☒ individual ☒ official capacity. (Check one or both.) Explain how this defendant was acting

under color of law: As Outside Contracted Neurologist of CSP, this defendant has an affirmative duty to assure that Plaintiff's Medical needs, which were/are contracted to his Medical Group, are acted upon. However, the omissions (deprivations of known and needed C-Spine Stenosis and C-Spine Facet/Medical Care) are "sufficiently harmful and Plaintiff is continuing to have severe chronic Cervical and Lumbar pain; and is subjected to "wanton" deprivations of his Medical needs, which have been contracted to, and recommended by this defendant; violating Plaintiff's right protected by Federal Law. (Eighth Amendment).

**C. Causes of Action** (You may attach additional pages alleging other causes of action and the facts supporting them if necessary.)

**Count 1:** The following civil right has been violated: The Objective and Subjective right to Medical  
(E.g., right to medical care, access to courts,

Care, and Freedom from Cruel and Unusual Punishment, under the Eighth Amendment, Federal Law.  
due process, free speech, freedom of religion, freedom of association, freedom from cruel and unusual punishment, etc.)

**Supporting Facts:** [Include all facts you consider important to Count 1. State what happened clearly and in your own words. You need not cite legal authority or argument. Be certain to describe exactly what each defendant, by name, did to violate the right alleged in Count 1.]

1. On February 7, 2008, the Director's Level Appeal Decision was finally returned to Plaintiff, and was denied; exhausting the administrative remedy, available to him within the Department of Corrections and Rehabilitation (CDCR). (See Ex. A at 1-2).

2. On November 2, 2006, due to Plaintiff's severe pain, a Radiologist (Joy Mason-Johnson, M.D., Inc) performed an examination of Plaintiff's chest, and observed "mild degenerative changes of the dorsal spine." (See Ex. A at 37).

3. On December 3, 2006, Dr. Thornton (ordering physican) requested that Plaintiff receive an MRI of the Cervical Spine; and the MRI was performed on December 26, 2006. Hence, "Spinal Stenosis noted throughout the bulk of the Spine region." (See Ex. A at 33-36).

4. On February 9, 2007, an "abnormal MRI of Plaintiff's C-Spine" was written, seen as ASAP, and signed by D. Khatri, M.D. "(PCP)", on May 10, 2007.

5. On March 15, 2007, and May 4, 2007, D. Khatri, M.D., recommended Plaintiff for a Neurosurgery Consultation; and Spinal Stenosis Cervical Spine. (See Ex. A at 30-31).

6. On May 10, 2007, Plaintiff's Clinical Status had become worse, and he should have seen a Physical Therapy Specialist within 30 days of May 27, 2007, and June 20, 2007; as per Dr. S. Aymar's stamp. (See Ex. A. at 28-29).

7. On July 5, 2007, and July 25, 2007, Dr. D. Khatri, M.D., made more recommendations for Plaintiff to undergo Neurosurgery F/U,

1 C-Spine Spinal Stenosis, with Dr. Calvin, M.D.... (See Ex. A at 26-  
2 27).

3 8. On July 20, 2007, C. Cook, CEN/AGPA is on record making ex-  
4 cuses for why the Medical Department of Centinela State Prison, has  
5 not performed the badly needed, long overdue, and Medically Ordered  
6 Physical therapy, dated 5/10/07, on Plaintiff. (See Ex. A at (In-  
7 formal Level 602 Appeal Response) 3-4)

8 9. On August 2, 2007, Travis H. Calvin Jr., M.D., sent Dr.  
9 Thornton a five (5) page discussion and recommendation, to help  
10 with Plaintiff's severe lumbar and chronic cervical pain. (See Ex.  
11 A at 19-25).

12 10. On September 11, 2007, C. Cook, AGPA, and Dr. D. Khatri, M.D.  
13 , Chief Physician Centinela State Prison, are now both on record  
14 (First Level Response 602 Appeal) stating the recommendation of  
15 an outside Neurologist, Dr. Calvin, on 8/2/07; concerning Plaintiff's  
16 need of C-Spine Facet Blocks. However, also noting that,  
17 "physical therapy services continue to be at a standstill; with  
18 health care administration aware of the issue." (See Ex. A at 5)

19 Additionally, in the month of September 2007, Dr. Aymar is also  
20 on record knowing of and acknowledging that the "C-Spine Facet  
21 Blocks are worse." (See Ex. A at 17-18. Plaintiff is/was outraged  
22 to find that he had been billed on, 09/30/07, for a "so called"  
23 Physical Therapy. (See Ex. A at 15-16).

24 11. On October 29, 2007, C. Cook, AGPA, and L. Calderon, AW-Heal-  
25 th Care Manager (A)(HCS), are now both on record, (Second Level  
26 602 Appeal Response) stating that a review of Plaintiff's, "health  
27 record reveals you have received physical therapy services on 10/  
28 06/07 and 10/24/07 for self exercise program instruction." (See Ex.

1 A at 6-8). However, AGPA Cook's, and AW-HCS Calderon's Response,  
2 is "Belied" by the fact that Plaintiff never received Physical  
3 Therapy, on 10/06/07 nor 10/24/07; in that, CSP Medical Staff still  
4 dose not have the equipment to perform the badly needed Physical  
5 Therapy. (See Ex. A at 9).

6 12. On October 11, 2007, an appointment was made for Plaintiff,  
7 by Dr. Khatri, to Dr. Calvin, for Neurosurgery evaluation. And, on  
8 October 25, 2007, Dr. Calvin documented Plaintiff's MRI Scan. (See  
9 Ex. A at 13-14).

10 13. In the Month of December 2007, Dr. Khatri made appointments  
11 for Plaintiff, concerning (surgery) "Epidural Injection." (See Ex.  
12 A at 10-12).

13 14. IT MUST BE NOTED: Plaintiff has never refused any medical  
14 treatment; (i.e., "cervical spine facet blocks recommended by Dr.  
15 Calvin (See Ex. A at 1"III A. Findings")) nor has Plaintiff been  
16 given the recommended Epidural Injections. Plaintiff has been given  
17 many recommendations, but no treatment; nor has Plaintiff signed  
18 anything refusing treatment.

## 1 MEMORANDUM OF POINTS AND AUTHORITIES IN SUPPORT OF 42 U.S.C. 1983

2 A plaintiff can state a § 1983 claim based on Eighth Amendment  
3 violations by alleging facts showing that Prison Officials acted  
4 with Deliberate Indifference to a serious medical need; as in the  
5 instant case.

6 The Eighth Amendment Prohibition of "cruel and unusual punish-  
7 ment" proscribes treatment of prisoners and prison conditions "which  
8 are incompatible with 'the evolving standards of decency that mark  
9 the progress of a maturing society'... or ... 'involve the unneces-  
10 sary and wanton infliction of pain.'" Estelle v. Gamble, 429 U.S.  
11 97, 102-03 (1976) (quoting Trop v. Dulles, 356 U.S. 86, 101 (1958)  
12 and Gregg v. Georgia, 428 U.S. 153, 173 (1976)(joint opinion of  
13 Stewart, Powell and Stevens, JJ.); see also Helling v. McKinney,  
14 509 U.S. 25, 32 (1993). State Prison Officials who are responsible  
15 for violating a prisoner's Eighth Amendment rights are subject to  
16 liability under 42 U.S.C. § 1983 ("§1983"). Leer v. Murphy, 844  
17 F.2d 628, 633 (9th Cir.1988). In the area of medical care for pri-  
18 soners, prison officials, including physicians, violate the Eighth  
19 Amendment when their acts or omissions are "sufficiently harmful to  
20 evidence deliberate indifference to serious medical needs." Estelle  
21 , U.S. at 106.

22 Thus, a valid cause of action against prison authorities is  
23 stated by alleging (1) serious medical need and (2) deliberate  
24 indifference on the part of the officials and doctors, as in stated  
25 in the instant case. The First is an objective, sufficiently seri-  
26 ous harm. Farmer v. Brennan, 511 U.S. 825, 834 (1994); Clement v.  
27 Gomez, 298 F.3d 898, 904 (9th Cir.2002). It is satisfied where "the  
28 failure to treat a prisoner's condition could result in further

1 significant injury or the 'unnecessary and wanton infliction of  
 2 pain.'" McGuckin, 974 F.2d at 1059 (quoting Estelle, 429 U.S. at  
 3 104). Indications of serious need include "[t]he existence of an  
 4 injury that a reasonable doctor or patient would find important and  
 5 worthy of comment or treatment; the presence of a medical condition  
 6 that significantly affects an individual's daily activities; or the  
 7 existence of chronic and substantial pain...." McGuckin, 974 F.2d  
 8 at 1059-60; see also Wood v. Housewright, 900 F.2d 1332, 1337-41  
 9 (9th Cir.1990); Hunt v. Dental Dep't, 865 F.2d 198, 200-01 (9th Cir  
 10 1989).

11 The Second element is subjective, i.e., whether the official  
 12 had a culpable state of mind. The element is satisfied where an  
 13 official "knows of and disregards an excessive risk to inmate health  
 14 or safety; the official must both be aware of the facts from which  
 15 the inference could be drawn that a substantial risk of serious  
 16 harm exists, and he must also draw the inference." Farmer, 511 U.S.  
 17 at 837. "the requirement of deliberate indifference is less strin-  
 18 gent in cases involving a prisoner's medical needs than in other  
 19 cases involving harm to incarcerated individuals because 'the  
 20 state's responsibilty to provide inmates with medical care ordinari-  
 21 ly does not conflict with competing administrative concerns."  
 22 McGuckin, 974 F.2d at 1060 (quoting Hodson v. McMillian, 503 U.S.  
 23 1, 6 (1992)). The indifference can be "manifested by prison doctors  
 24 in their response to the prisoner's needs or by prison guards in  
 25 intentionally denying or delaying access to maedical care or inten-  
 26 tionally interfering with the treatment once prescribed. regardless  
 27 of how evidenced, deliberate indifference to a prisoner's serious  
 28 illness or injury states a cause of action under § 1983." Estelle,

1 429 U.S. at 104-05 (footnotes omitted).

2 Allegations that have satisfactorily demonstrated deliberate in-  
3 difference (as shown in points 1-14 herein) to serious medical need  
4 include delaying dental treatment for three months (Hunt, 865 F.2d  
5 at 200-01); ignoring repeated recommendations for surgery (as in  
6 the instant case) (Shapley v. Nevada Bd. Of State Prison Comm'rs,  
7 766 F.2d 404, 408 (9th Cir.1985) (per curiam)); denying showers and  
8 medical attention for four hours following incidental exposure to  
9 papper spray (Clement, 298 F.3d at 904-05); and failing to provide  
10 a special, prescribed diet (Lopez v. Smith, 203 F.3d 1122, 1132  
11 (9th Cir.2000) (en banc)).

12  
13 CONCLUSION

14 For the reasons set forth above, Plaintiff's prayerful request  
15 are made known on the next page.

16  
17  
18 DATED: APRIL 20, 2008

*Anthony Esposito*

**E. Request for Relief**

Plaintiff requests that this Court grant the following relief:

1. An injunction preventing defendant(s): \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

2. Damages in the sum of \$ 150,000.

3. Punitive damages in the sum of \$ 350,000.

4. Other: \_\_\_\_\_

**F. Demand for Jury Trial**

Plaintiff demands a trial by ☒ Jury ☐ Court. (Choose one.)

**G. Consent to Magistrate Judge Jurisdiction**

In order to insure the just, speedy and inexpensive determination of Section 1983 Prisoner cases filed in this district, the Court has adopted a case assignment involving direct assignment of these cases to magistrate judges to conduct all proceedings including jury or bench trial and the entry of final judgment on consent of all the parties under 28 U.S.C. § 636(c), thus waiving the right to proceed before a district judge. The parties are free to withhold consent without adverse substantive consequences.

The Court encourages parties to utilize this efficient and expeditious program for case resolution due to the trial judge quality of the magistrate judges and to maximize access to the court system in a district where the criminal case loads severely limits the availability of the district judges for trial of civil cases. Consent to a magistrate judge will likely result in an earlier trial date. If you request that a district judge be designated to decide dispositive motions and try your case, a magistrate judge will nevertheless hear and decide all non-dispositive motions and will hear and issue a recommendation to the district judge as to all dispositive motions.

You may consent to have a magistrate judge conduct any and all further proceedings in this case, including trial, and the entry of final judgment by indicating your consent below.

Choose only one of the following:

☒ Plaintiff consents to magistrate judge jurisdiction as set forth above.

OR

☐ Plaintiff requests that a district judge be designated to decide dispositive matters and trial in this case.

**DIRECTOR'S LEVEL APPEAL DECISION**

Date: **FEB 07 2008**

In re: Anthony Esposito, D94335  
Centinela State Prison  
P.O. Box 731  
Imperial, CA 92251-0731

IAB Case No.: 0713807

Local Log No.: CEN-07-00850

This matter was reviewed on behalf of the Director of the California Department of Corrections and Rehabilitation (CDCR) by Appeals Examiner J. Robinson, Supervising Registered Nurse II. All submitted documentation and supporting arguments of the parties have been considered.

**I APPELLANT'S ARGUMENT:** It is the appellant's position that the off-site neurosurgeon ordered the appellant to be treated with physical therapy. The appellant alleges the Centinela State Prison (CEN) medical department has denied the appellant treatment. The appellant complains of persistent severe pain. The appellant requests to be treated with physical therapy and to reserve the right to request punitive damages depending on the outcome of this appeal. The appellant denies receiving physical therapy on October 6, 2007 and October 24, 2007.

**II SECOND LEVEL'S DECISION:** The reviewer found that the appeal was granted at the Second Level of Review by L. Calderon, Health Care Manager (A). Review of the Unit Health Record (UHR) indicates the appellant has received physical therapy services for a self exercise program, on October 6, 2007 and October 24, 2007. The appellant had a follow-up consultation with Dr. Calvin (Neurologist) on August 2, 2007. The neurologist recommended spinal facet blocks and instructed the appellant to discontinue heavy workouts. Dr. Ayman generated a request for a current magnetic resonance imaging (MRI) of the appellant's spine. Dr. Ayman reinforced the instructions to limit exercise to walking.

**III DIRECTOR'S LEVEL DECISION:** Appeal is denied.

**A. FINDINGS:** Information and documentation in the UHR and provided by C. Cook, Health Care Appeals Coordinator, indicates the appellant received Physical Therapy services on October 6, 2007 and October 24, 2007. The appellant refused cervical spine facet blocks recommended by Dr. Calvin, Neurologist on October 13, 2007 and October 24, 2007. The appellant had a MRI on October 16, 2007 and received a follow-up visit with Dr. Ayman. Medical staff instructed the appellant to limit exercises to walking. The appellant was referred to the neurosurgeon for epidural injections; the appointment is pending and will be scheduled chronologically. The health care staff is monitoring the appellant's condition and does not recommend physical therapy or strenuous exercises. Based upon the information and documentation provided, there is no compelling evidence to require intervention or modification at the Director's Level of Review.

**B. BASIS FOR THE DECISION:**

California Code of Regulations, Title 15, Section: 3350, 3350.1, 3350.2, 3354

**C. ORDER:** No changes or modifications are required by the Institution.

ANTHONY ESPOSITO, D94335  
CASE NO. 0713807  
PAGE 2

This decision exhausts the administrative remedy available to the appellant within CDCR. If dissatisfied, the appellant may forward this issue to the California Victims Compensation and Government Claims Board, (formerly known as the State Board of Control), Government Claims Unit, P.O. Box 3035, Sacramento, CA 95812-3035, for further review.

BRANCH

You may appeal any policy, action or decision which has a significant adverse affect upon you. With the exception of Serious CDC 115s, classification committee actions, and classification and staff representative decisions, you must first informally seek relief through discussion with the appropriate staff member, who will sign your form and state what action was taken. If you are not then satisfied, you may send your appeal with all the supporting documents and not more than one additional page of comments to the Appeals Coordinator within 15 days of the action taken. No reprisals will be taken for using the appeals procedure responsibly.

A. Describe Problem: This is a citizen complaint against Centinela Medical Department and Medical Board pursuant to P.C. 832.5 in regards to medical treatment. This is an ongoing problem of a medical condition which violated, but not limited to California code of regulations CCR 5 §§ 3350.11(y)(5); 3354(e)(1) P.C. 2600.2601 which all support violation of the Eighth and Fourteenth Amendment and all substantiate reckless & callous indifference. Denied to proper and medical treatment Appellant continue suffering because of the lack of medical treatment denied by the Medical Department and Medical Board here at Centinela. Because of

If you need more space, attach one additional sheet.

(See Attached Sheet)

B. Action Requested: Appellant respectfully request to Centinela Medical Board to allow the appellant to be treated with physical therapy according to the outside specialist neuro surgeon, and D-yard doctor's orders. Also Appellant reserve the right to request punitive damage and pain suffering depending on the direct outcome of this appeal.

Inmate/Parolee Signature:

Date Submitted: 7-10-07

C. INFORMAL LEVEL (Date Received: JUL 16 2007)

PLEASE COMPLETE AT INFORMAL LEVEL  
-INMATE APPEALS OFFICE-

Staff Response: Your appeal is partially granted. In responding to your appeal I (C. Cook, CEN/Medical Appeals Analyst) reviewed your Health Record and found Physical Therapy was ordered for you on 5/10/07 but we are having acute difficulties obtaining that service due to very limited resources for that specialty. Our health care administration is aware of the problem and is working to remedy it, your patience is appreciated and the service will be scheduled as the resources become available.

Staff Signature: C. Cook

Date Returned to Inmate: JUL 20 2007

## D. FORMAL LEVEL

If you are dissatisfied, explain below, attach supporting documents (Completed CDC 115, Investigator's Report, Classification chrono, CDC 128, etc.) and submit to the Institution/Parole Region Appeals Coordinator for processing within 15 days of receipt of response.

I am dissatisfied with the informal response, due in part to, I have been patient with regards to this institution medical services come on line. Nevertheless, my medical condition to date is not stabilizing. But, in fact, becoming worse each day Centinela medical staff fails to provide me adequate medical attention that would relieve my pain and suffering.

Date Submitted: 8/10/07

H. If dissatisfied, add data or reasons for requesting a Director's Level Review, and submit by mail to the third level within 15 days of receipt of response. Appellant is dissatisfied with the first level of response. On 8/10/07, appellant was informed that the therapist didn't have the adequate and proper equipment to proceed with the therapy as it was recommended by the CEN physicians. 3 x per week. On 8/10/07, appellant was informed that the therapist was informed that the therapist will not be able to treat him because they didn't have the equipment (see the back side of the document and signature of the physical therapist as exhibit "A"). Appellant continues to suffer from the persistent pain, and no therapy has been done on him to this date. Appellant has been charged a bill of \$300.00 (see exhibit B). The physical therapist have been arranged by CEN doctors, not by appellant. Therefore that bill shall be spent, delete and dismission from appellant account and proper and adequate treatment should be given to appellant. Therefore, further appealed.

F. If dissatisfied, explain reasons for requesting a Second-Level Review, and submit to Institution or Parole Region Appeals Coordinator within 15 days of receipt of response. Appellant is dissatisfied with the first level of response. On 8/10/07, appellant was partially granted based on the acute doctor's recommendation for my physical therapist treatment. Four (4) months had been passed and appellant continues to suffer from the physical therapy. The medical department is acting callously and unwillingly by letting to appellant to suffer from an unnecessary pain. Therefore, the medical department continued violated my right to human treatment under the ECHR. Appellant is not only that but medical department is interfering with the CORE and outside doctor's recommendation for my physical therapist treatment. Therefore, further appealed.

APPEAL RESPONSE LEVEL: FIRST

DATE: September 11, 2007

TO: ESPOSITO, ANTHONY

CDC #: D94335

APPEAL LOG #: CEN-D-07-00850

ISSUE APPEALED: Medical – Referral/Physical Therapy

INTERVIEW:

You were interviewed on 9/6/07 by Dr. Aymar, regarding your appeal issue.

PROBLEM DESCRIPTION / ACTION REQUESTED:

You are requesting physical therapy for relief of chronic cervical pain.

APPEAL RESPONSE:

Since the INFORMAL level response you were assessed again by Dr. Aymar on 9/6/07 who notes you received a follow-up consultation with our outside contracted neurologist, Dr. Calvin on 8/2/07 who now recommends C-spine facet blocks and instructed you to discontinue heavy workouts and to only walk for exercise. Dr. Aymar generated a request for a current MRI of your spine to assess changes; notes physical therapy is still pending and re-instructed you on limiting your exercise to walking only at this time.

Physical therapy services continue to be at a standstill with health care administration aware of the issue.

APPEAL DECISION:

Partially granted

APPEAL RESPONSE LEVEL: SECOND

DATE: October 29, 2007

TO: ESPOSITO, ANTHONY

CDC #: D-94335

APPEAL LOG #: CEN-D-07-00850

ISSUE APPEALED: Medical – Referral/Physical Therapy

INTERVIEW:

Completed on 9/6/07 at the FIRST formal level.

## PROBLEM DESCRIPTION / ACTION REQUESTED:

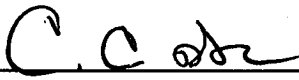

You are requesting physical therapy for relief of chronic cervical pain.

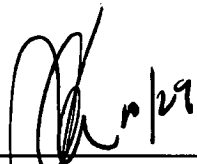

## APPEAL RESPONSE:

As relayed in the INFORMAL and FIRST level responses our institution was unable to obtain physical therapy services for a period but now have a contractor available to provide the service. Review of your Health Record reveals you have received Physical Therapy services on 10/6/07 and 10/24/07 for self exercise program instruction.

**From:** Cook, Candi  
**Sent:** Wednesday, January 09, 2008 3:07 PM  
**To:** Robinson, Jean  
**Subject:** RE: Inmate Appeals (DLR)

Received Physical Therapy on 10/6/07 and 10/24/07 with Fared Zia. Inmate refused C-spine facet blocks on 10/13/07 and 10/24/07. He had an MRI on 10/16/07 and received a follow-up on 12/20/07 with Dr. Aymar, who referred him to a neurosurgeon for epidural injections, which is pending and will be scheduled chronologically.

Imperial, California 92251-0731

RE: CDC ESPOSITO  
ANTHONY, D.  
D94335

Dear Dr. Thornton:

This 43-year old, right-handed male, Inmate, was re-evaluated. He was initially seen August 2, 2007 for lumbar pain, mostly chronic, with radiating left arm pain with weakness and neck pain.

The following are reviewed:

- 1) MRI Scan (09/27/07): At C4-5, a 2mm central disc protrusion causing mild flattening of the anterior aspect of the thecal sac, but not cord; at C5-6, a 3mm left paracentral disc protrusion which indents and deforms the cord at this level. There is evidence of spinal stenosis. Other levels appear to demonstrate minor changes. The C5-6 level is the largest protrusion.

**INTERVAL HISTORY:**

Continues with pain in the neck and pain in the left arm. Symptoms are not relieved by medications, including Acetaminophen and Neurontin. Clinically, no gait ataxias, but continues with left arm pain and weakness.

Dr. Donald Thornton  
**RE: CDC ESPOSITO**  
October 25, 2007  
Page 2

**NEUROSURGICAL EXAMINATION (10/25/07):**

VITAL SIGNS: HT: 5'7" WT: 188 POUNDS TEMP: 97.2 B/P: 130/80

Absent biceps, left brachioradialis and right triceps reflexes. Jamar: right, 98-112 pounds; left, 40-60-60 pounds. Major weakness left wrist extensors (4/5); grip estimated to be 50% of normal. Sensory: hypalgesia left lateral arm and hand (C5-C6-C7). Positive foraminal compression test, left at 60 degrees, from left shoulder to left lateral deltoid and moderate left forearm.

The low back examination is unremarkable.

**IMPRESSION:**

- 1) Chronic HNP, C4-5 and C5-6, left.
- 2) Left C5, C6, C7 radiculopathy.
- 3) Lumbosacral strain.

**DISCUSSION AND RECOMMENDATIONS:** Symptomatically, left foraminal blocks at C4-5 and C5-6 might benefit the patient. However, ultimately, I think the patient will require surgical intervention. Permission is requested to perform the blocks. This procedure was discussed with the patient and he is desirous of proceeding.

Sincerely,

TRAVIS H. CALVIN JR., M.D.

EL CENTRO, CA. 92243

Dear Mr. Calvin

I am writing you this letter in regards to the Bill that has been sent to me. I have been charged the amount of Three Hundred dollars (\$ 300.00), for the "so called" physical therapy.

I believe that your office has made a very big mistake in forwarding me this bill; in that, I'm an inmate incarcerated at Centinela State Prison. I'm under the jurisdiction and responsibility of the California Department of Correction and Rehabilitation ("CDCR")

IT MUST BE NOTED: I'm an indigent Inmate, as per 15 CCR Artie (4) sec. 3134; and Rules and Regulations of the Director of Corrections, Article 1 sec. 3000. Furthermore, the "so called" physical therapy, was ordered by CDCR Physicians, and arranged by the Medical Department of Centinela State Prison; not by me. Therefore, any bills and documentation must be sent to the Medical Desk here at Centinela, or Sacramento; but not to me.

I respectfully request that your Medical Records and Account Billing Office, remove and exsponge any bills in and from my name. And, send the bill to the Jurisdiction of Centinela State Prison Medical Personnel, or "CDCR."

Thank you for your time and prompt response to this matter. I will be waiting for any response to this letter and the dismissal of this bill and/or charges; under my name.

Sincerely

*A Esposito*

## RADIOLOGY REPORT

NAME: ESPPOSITO  
ORDERING PHYSICIAN: VU  
EXAMINATION: CERVICAL SPINE  
DATE: 8/7/2007  
CDC #: D-94335

### CERVICAL SPINE:

Examination of the cervical spine reveals slight dextroscoliosis of the upper dorsal spine. Very mild degenerative spurring is noted anteriorly at C4. A larger area of spurring is demonstrated at C5 with osteophytes extending superiorly and inferiorly. Developing osteophyte formation is also seen at C6. Very mild disc narrowing is noted at the C5-6 level. This does correlate with the patient's previous MRI. No additional abnormalities are observed.

### IMPRESSION:

Mild degenerative changes involving the lower cervical spine. Slight disc disease changes are demonstrated at C5-6.

**RADIOLOGY REPORT**

NAME: ESPOSITO  
ORDERING PHYSICIAN: THORNTON  
EXAMINATION: MRI OF THE CERVICAL SPINE  
DATE: 12/26/2006  
CDC #: D94335

**MRI OF THE CERVICAL SPINE:**

**TECHNIQUE:** Examination of the cervical spine was performed on a 1.5 tesla superconducting magnet. The following scan sequences were performed: T1 and T2 weighted sagittal images and T2 weighted axial images.

**FINDINGS:** The cord, as visualized, appears unremarkable. No signal abnormalities are identified. The posterior fossa, as seen is unremarkable. Some disc desiccation is demonstrated in throughout the cervical vertebrae. The C7-T1 level does not show disc desiccation.

At the C2-3 level, a 1 mm central disc protrusion is noted, which does not significantly deform the cord. The neural foramina are patent.

At the C3-4 level, a 1 mm central disc protrusion is observed which does about the cord, but does not cause deformity. There is spinal stenosis. The AP diameter is 10 mm. The neural foramina are patent, bilaterally, at this level.

At the C4-5 level, a 2 mm central disc protrusion is noted which causes mild flattening of the anterior aspect of the thecal sac but not the cord. No spinal stenosis is seen. The neural foramina are patent, bilaterally.

At the C5-6 level, a 3 mm left paracentral disc protrusion is noted which does indent and deform the cord at that level. There is evidence of spinal stenosis. The AP diameter of the spinal canal is only 10 mm. The neural foramina at this level are patent, bilaterally.

At the C6-7 level, a 1 mm left paracentral disc protrusion is noted which does not produce cord deformity. There is however, spinal stenosis at this level and mild narrowing of the right neural foramen and moderate narrowing of the left neural foramen.

**RE: CDC ESPOSITO  
ANTHONY, D.  
94335  
D94335**

Dear Dr. Thornton:

As you know, this 43-year old, right-handed male, Inmate, was initially seen May 10, 2007 for evaluation of lumbar pain and chronic cervical pain with radiating left arm pain. His complaints were chronic recurring neck on the left side, beginning in October, 2006 associated with a prior motor vehicle accident (June, 2004) and recent onset due to excessive weight lifting ("working out") in the gym. Patient has also had recurring pain in the right buttocks and numbness extending to the right toes. Primary symptoms this date was pain extending from the neck to the left rhomboid area, left shoulder, lateral left arm and into the left hand, which constantly felt asleep. He felt he was losing strength in the arm.

The physical examination (05/10/07) noted 4+/5 weakness, left arm, with bilateral weakness of the abductors/adductors of the fingers. This is consistent with left C6-C7 radiculopathy, moderate to mild; also noting major absent reflexes (brachioradialis, hypoactive; triceps and left biceps, absent). Neck motions are weakly positive to the left. The low back noted only positive straight leg raising tests at 80 degrees, right; normal gait; negative Babinski's and absent

Dr. Donald Thornton  
**RE: CDC ESPOSITO**  
August 2, 2007  
Page 2

reflexes. The MRI scan (12/26/06) was reviewed, noting multi-level small disc protrusions with a 3mm protrusion at C5-6 which did indent the cord at this level; spinal stenosis at C6-7; mild flattening of the thecal sac at C4-5 (J.M. Johnson, M.D., Radiologist). The x-rays were not available for my review on May 10, 2007. They are now available (see below).

**PRESENT SYMPTOMS:**

Continued left cervical (rhomboid) pain in the left arm, with numbness and tingling of the left hand. No right arm symptoms. Unable to elevate left arm above shoulder level because of pain in the left neck. Persistent weakness, left hand. No gait imbalances. Patient has received no physical therapy (not available). Continues on the above medications, but he feels they are not effective.

Low back continues symptomatic. Pain in the right buttocks with feelings of shooting pain from the lumbosacral region to the right buttock area. Persistent numbness and tingling of the right three toes (3, 4 and 5). Does have pain symptoms in the posterior thigh.

**PAST HISTORY:**

Long-standing history of asthma; presently under control. **MEDICATIONS:** Lavastein (Abuterol); Baclofen (for pain); Methecarbomal, 750 mg., b.i.d.; Naprosyn, 500 mg. **ALLERGY TO PENICILLIN. Codeine causes him to break out.** The motor vehicle accident of 2004 did result in neck and low back injuries.

**NEUROSURGICAL EXAMINATION (08/02/07):**

**VITAL SIGNS:** HT: 5'7" WT: 186 POUNDS TEMP: 98.2 B/P: 120/90

**GENERAL APPEARANCE:**

Hypersthenic, adult male, sits comfortably, appears in no immediate distress.

**CRANIUM, CEREBRUM, CRANIAL NERVES AND CEREBELLUM:**

Intact, including Romberg and tandem walking.

Dr. Donald Thornton  
**RE: CDC ESPOSITO**  
August 2, 2007  
Page 3

**CERVICAL SPINE AND UPPER EXTREMITIES:**

**GENERAL:** No atrophies, fasciculation or vasomotor changes. Shoulder abduction limited to 120 degrees, left; with acute pain, left rhomboid to the left shoulder; right, 170 degrees, no complaints.

**MOTOR:** Right arm: normal; left arm: deltoids, wrist extensors, triceps and finger abductors are 4+/5; definitely weak. Jamar: right, 94/110/98 pounds; left, 84/65/80 pounds.

**SENSORY:** Hypalgesia, left C5-6, C6-7.

**REFLEXES:** Biceps, brachioradialis and triceps: absent. No Hoffman's.

**NECK:** Flexion/extension: normal, but do cause acute pain in the left rhomboid. Right rotation: 80 degrees; left rotation: 70 degrees; both causing pain, left rhomboid. Positive foraminal compression test to the left lateral shoulder area; negative to the right. Tenderness is present, left side of the neck. There is moderate spasm.

**THORACOLUMBAR, GLUTEAL REGION AND LOWER EXTREMITIES:**

**GENERAL:** No atrophies, fasciculation or vasomotor changes.

**REFLEXES:** Achilles reflexes continue absent.

**MOTOR:** Normal.

**SENSORY:** Slight hypalgesia, right L5-S1.

**BACK:** Stands erect, level pelvis. Forward bends to 45 degrees (fingers reach 14" from floor); complains of right buttock pain. Sitting knee extension test and straight leg raising tests are positive on the right at 90 degrees; negative left.

**GAIT:** Normal; able to walk on toes.

Dr. Donald Thornton  
**RE: CDC ESPOSITO**  
August 2, 2007  
Page 4

**REVIEW OF MRI SCAN:**

I would concur with the Radiologist that the patient has significant spinal stenosis, most of which appears on the base as congenital canal narrowing. However, the patient clearly has a deformity of the spinal cord, secondary to small bulging disc at C5-6; but also at C6-7 and mild at C4-5. No subluxations, et al.

**IMPRESSION:**

- 1) Left C5-C6 radiculopathy; mild to moderate, due to #2. (723.4)
- 2) Congenital stenosis, cervical spine, C4-C7; with #3. (723.0)
- 3) Chronic HNP, small, C5-6. (722.00)
- 4) Right sciatica, possible small HNP. (724.3)

**DISCUSSION AND RECOMMENDATIONS:**

- 1) Patient states he is to undergo a lumbar spine x-ray, then to be followed by an MRI scan of the lumbar spine. I would concur and recommend this be performed.
- 2) Patient does have congenital stenosis of the cervical spinal canal with bulging disc as described by the Radiologist. Clinically and neurologically, he does present with left arm weakness, pain, numbness, consistent with C5, C6 and C7; questionably C8. He does not appear to myelopathic changes. I would recommend conservative treatment as much as possible and initially recommend left-sided foraminal blocks, particularly C6-7 and C5-6. I do not feel comfortable with an epidural block in the face of major stenosis of the cervical spinal canal and do not recommend it. (Canal has virtually no subarachnoid space around the spinal block.) A lateral block would have virtually no risk; and since he is symptomatic only on the left side, this may be sufficient to ameliorate his symptoms.
- 3) I recommend no weight lifting or vigorous exercise program. This generally would tend to aggravate the cervical spinal condition.

Dr. Donald Thornton  
**RE: CDC ESPOSITO**  
August 2, 2007  
Page 5

- 4) A walking exercise program probably would benefit the patient and provide reasonable physical conditioning.
- 5) Lumbar spine treatments would depend upon findings of the current studies. I would recommend these be completed and would like to re-evaluate him after they are completed.

Sincerely,

A handwritten signature in black ink, appearing to read "Travis H. Calvin Jr.", with a stylized, flowing script.

TRAVIS H. CALVIN JR., M.D.

## RADIOLOGY REPORT

NAME: ESPOSITO  
ORDERING PHYSICIAN: THORNTON  
EXAMINATION: MRI OF THE CERVICAL SPINE  
DATE: 12/26/2006  
CDC #: D94335

### MRI OF THE CERVICAL SPINE:

**TECHNIQUE:** Examination of the cervical spine was performed on a 1.5 tesla superconducting magnet. The following scan sequences were performed: T1 and T2 weighted sagittal images and T2 weighted axial images.

**FINDINGS:** The cord, as visualized, appears unremarkable. No signal abnormalities are identified. The posterior fossa, as seen is unremarkable. Some disc desiccation is demonstrated in throughout the cervical vertebrae. The C7-T1 level does not show disc desiccation.

At the C2-3 level, a 1 mm central disc protrusion is noted, which does not significantly deform the cord. The neural foramina are patent.

At the C3-4 level, a 1 mm central disc protrusion is observed which does abut the cord, but does not cause deformity. There is spinal stenosis. The AP diameter is 10 mm. The neural foramina are patent, bilaterally, at this level.

At the C4-5 level, a 2 mm central disc protrusion is noted which causes mild flattening of the anterior aspect of the thecal sac but not the cord. No spinal stenosis is seen. The neural foramina are patent, bilaterally.

At the C5-6 level, a 3 mm left paracentral disc protrusion is noted which does indent and deform the cord at that level. There is evidence of spinal stenosis. The AP diameter of the spinal canal is only 10 mm. The neural foramina at this level are patent, bilaterally.

At the C6-7 level, a 1 mm left paracentral disc protrusion is noted which does not produce cord deformity. There is however, spinal stenosis at this level and mild narrowing of the right neural foramen and moderate narrowing of the left neural foramen.

NAME: ESPOSITO  
ORDERING PHYSICIAN: THORNTON  
EXAMINATION: MRI OF THE CERVICAL SPINE  
DATE: 12/26/2006  
CDC #: D94335

## MRI OF THE CERVICAL SPINE (Cont.):

At the C7-T1 level, no significant disc bulging is noted. No spinal stenosis is seen. The neural foramina are patent.

## IMPRESSION:

Spinal stenosis noted throughout the bulk of the cervical spine region. The largest protrusion is noted at the C5-6 level, where a 3 mm left paracentral disc protrusion is seen. Also, at the C4-5 level, a 2 mm central disc protrusion is observed. Neural foraminal stenosis, to a mild to moderate degree, was noted at the C6-7 level.
